Roberto Carlos TIENTCHEU NOUAKE

has successfully completed the online, non-credit Professional Certificate

IBM Program Manager

Completers of this professional certificate gain a comprehensive understanding of the program manager role, equipping them with the skills necessary for entry-level positions in the field. They learn essential program management skills, including defining program manager responsibilities, explaining the program lifecycle, and enhancing strategic planning and execution. Completers can summarize portfolio planning, evaluate the benefits realization process, apply risk management strategies, and analyze stakeholder needs and expectations. Additionally, they can create a business case, benefits management plan, and program roadmap that adheres to PMI's ethical standards and professional conduct. They are also adept at utilizing tools and technologies commonly used by program managers.
